

Letters

Dear Editor,

FINALLY, a magazine for me! I'm not a: hunter, police officer, bounty hunter, soldier, soldier of fortune, gunsmith, gun collector, camper, urban warfare specialist, political activist, secessionist, reloader or wilderness recluse with interest in bomb shelters, MREs and windmill electrical generators. I don't know how I got on so many mailing lists, but someone presumes I fit in those categories, plus more.

Until recently, I've had to purchase all kinds of magazines just to get pieces of helpful information about concealed carry. That ended with the advent of your magazine...excuse me, MY magazine. My wife and I have thoroughly enjoyed every issue and always wait with anticipation of the next issue. *Concealed Carry Magazine*, addresses absolutely every self defense issue of concern

to intelligent Americans today, provides vital information regarding products, services and organizations relevant to concealed carry and communicates critical self defense information. Thanks. Please keep up this good work!

William M. Splawn — Irmo, SC

Dear Editor,

My husband and I recently subscribed to your magazine and found it to be a great resource. There are no other sources that provide the same information you do all in one read. You have a great magazine. Thank you. We'll be sure to tell our friends.

Maggie — Irving, TX

Send your letters to:

*Concealed Carry Magazine, Attn: Editor,

Jackson, WI 53037.
Or Email: editor@concealedcarrymag.com.*

Due to volume received, not all letters can be answered. Letters may be edited for space and clarity.

**PRODUCT UPDATE
KEL-TEC P3AT - GEORGE HILL**

want to extend your reach a little and shoot at some smaller targets or you require more precision in your sight alignment...then you will want a P-Sight.

You can see that the P-Sight gives you a normal style rear sight to work from. I found that this little widget does help with your precision aiming and makes shooting target groups that much easier. Unfortunately, the rear sight doesn't

address the problem with the front sight, which remains rather vague and easy to lose. So trying to line the rear sight with the almost nonexistent front sight is a little slower and a little challenging. With some practice to get use to the set up, you can work the little Kel-Tec like a mini target pistol with some good results.

The P-Sight comes with a little instruction booklet and an optional little tube of Loctite's Black Max 380 glue. Use just a teeny bit and that's all you'll need...that sight ain't going anywhere with that stuff. (Get the optional glue... handy stuff to have around if you don't have any) Once mounted and the adhesive allowed to dry completely, the gun is ready for duty. The rear sight addition is unobtrusive. It doesn't snag going into the pocket, and more importantly coming back out quickly.

Whether or not you will personally find the P-Sight useful would depend completely upon what type of shooting you want to do with your P3AT. While I like it, I'll have to put it into that "You have to try it out for yourself" category.

In my previous review of the P3AT, I mentioned an aftermarket addition called the "P-Sight". The P-Sight is a drop in rear sight widget that you just glue in. While I mentioned it in passing, as something of interest for those that had the Kel-Tec P3AT, I hadn't actually had a chance to play with one of these sights.

In the photos, you can see the normal "Rear Sight" and the "P-Sight". The P3AT is a surprisingly accurate little gun, but the sights are only mere suggestions and most of the aiming is done with gross alignment of the shape of the slide against the target. It's fast and it works fine against close range, torso sized targets. However if you
